

Card Printer Maintenance

Cleaning Cards, Adhesive Cleaning Cards/Rollers, Pens/Swabs, Wipes and Lapping Films.

Your Reliable Partner for Manufacturing of High Quality Technical Cleaning Kits

Compatible use with :

- Zebra Cleaning Kits
- Evolis Cleaning Kits
- Magicard Cleaning Kits
- Datacard Cleaning Kits
- Fargo Cleaning Kits
- Smart Cleaning Kits
- Pointman Cleaning Kits
- Hiti Cleaning Kits
- Matica Cleaning Kits

Card Printer Cleaning Kits

About Meditech Card Printer Cleaning Kits

Meditech Technology Co.,Ltd is a manufacturer of card printer cleaning kits and provides a full range of technical cleaning products. It includes special and standard size IPA pre-saturated cleaning cards, adhesive cleaning rollers, adhesive cleaning cards, IPA pre-saturated cleaning swabs, IPA cleaning pens, IPA cleaning wipes and lapping films.

Routine preventive maintenance cleaning of the card printer's transport rollers, magnetic encoder station and print head will improve high quality graphic image printing and extend the service life of a thermal print head.

Card printer cleaning kits are classified into 5 categories :

1) IPA Pre-saturated Cleaning Cards

Application: Cleaning cards effectively clean and remove accumulated dust, debris, contaminants and ink stain residue on the transport rollers and magnetic encoder station.

We provide a comprehensive range of long I-cleaning cards, T-cleaning cards and standard size CR80 cleaning cards for use with most card printers.

Regular use of these cards will clean and maintain important parts of the printer that cannot be reached, including the print head, transport rollers, and optional magnetic encoding station.

Card Printer Adhesive Cleaning Rollers and Cleaning Cards

2) Adhesive Cleaning Rollers and Adhesive Cleaning Cards

Application : Both items effectively clean and remove accumulated dust, and contaminants from the surface of the transport rollers and the PVC blank card prior to printing.

Meditech produces adhesive cleaning rollers compatible with Magicard, Zebra/Javelin, Datacard and Fargo Card Printers.

Cleaning rollers are installed in the cleaning cartridges. The adhesive rollers pick up debris from blank cards prior to printing. These rollers should be replaced periodically.

Adhesive cleaning cards for cleaning Zebra, Datacard, Fargo, Nisca and DNP Printers are also available

Thermal Print Head Cleaning Swabs and Pens

3) IPA Cleaning Swabs and IPA Cleaning Pens

Application : Regular cleaning of the thermal print head will greatly improve the high quality graphic image printing, thus extending the service life of the print head.

Cleaning Swabs or Pens can be used to remove visible deposits from the print head when print abnormality appears on printed cards.

It is important not to use a sharp object to scrape deposits from the print head, as it may cause permanent damage.

It is more economical to use either IPA Self-saturated Foam Swabs or IPA Pre-saturated Clean Swabs for cleaning the thermal print heads.

The IPA Cleaning Pen is the best option for repeated use.

IPA Pre-saturated Clean Swab
Length of Swab : approximately 5.0”
Packaging : 50 Swabs/Box
Part Number : IPAPFS-707

IPA Cleaning Pen
Packaging : 12 Pens/Box
Part Number : IPACP-03

IPA Self-saturated Foam Swab
Length of Swab : approximately 4.5”
Packaging : 25 Swabs/Box
Part Number : IPASS-4.5-25

IPA Self-saturated Foam Swab
Length of Swab : approximately 4.5”
Packaging : 50 Swabs/Box
Part Number : IPASS-4.5-50

Card Printer Cleaning Wipes

4) Card Printer Cleaning Wipes

Spunlace wipes are pre-saturated with either IPA or Alcohol-free solution.

Meditech IPA cleaning wipes are used for cleaning detachable transport rollers, parts and equipment casing.

Meditech screen cleaning wipes are pre-saturated with our proprietary formulated Meditech Crystal Polish Cleaner that will safely clean and protect the screen surface.

The dry wipe is then used to wipe and polish the screen.

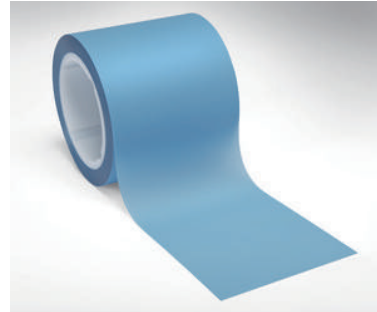

Technical Cleaning Wipes
Packaging : 40 pieces per box

Technical Cleaning Wipes
Packaging : 100 pieces per box

5) Thermal Print Head Lapping Films

Lapping film rolls can be fabricated into sheets of various sizes : 3"x 6" , 4" x 6" , 4" x 8" , or even customised to meet Customer's specific need.

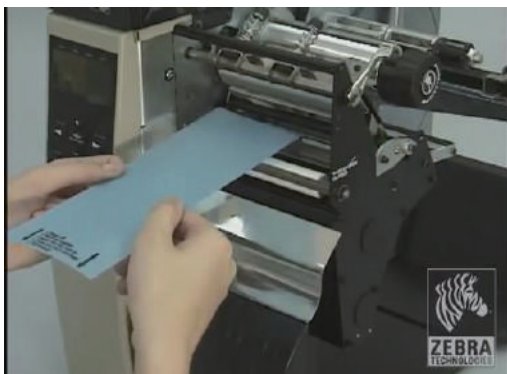

4"x 6" Lapping Film is the most popular size sold in the market.

If there are light scratches on the Thermal Print Head, you can restore the surface by polishing it with aluminium oxide coated Lapping Film. But special care must be taken to ensure that polishing is carried out correctly.

It is individually packed in a Ziplock Poly Bag.

Each Lapping Sheet can be used up to 6 times.

Effect : It removes burnt-on contaminants, as well as refurbishes and restores all print heads.
